Streamline your business and improve team productivity

Project Portfolio Management

Ensure projects are in line with the company's strategic objectives as well as the functions required to track, manage and manipulate their projects from a high level.

Planning and Gantt Chart

The Genius Planner Gantt chart tool is designed to facilitate project planning and resource management simultaneously. Use it for individual resources or allow managers to use for their entire teams.

Resource Management

This function helps team and project managers view their resources availability, workload and capacity filtered by a variety of different criteria helping PMs select the best resources for the job.

Time and Expense Tracking

The Timesheets module provide a one stop shop for gathering all actual labour and expense costs generated and incurred by resources for each individual project.

Project Tracking

Using the following Genius Project tools, project managers will be able to maintain a constant eye over the progress of their projects and efficiently plan and track their completion.

Cost and Budget Management

Genius Project's cost and budget management takes the math out of budgeting. By simply having resources input their expenses and time, Genius Project automatically does the rest.

Invoicing

This modules includes all of the tools necessary to either automatically generate invoices for all billable labor and expenses captured in the software or to schedule billing milestones.

Demand Management

Companies can design unique request, approval and tracking workflows to capture the specific information and standardize the collection of data across projects, departments and/or even the entire organization.

Document Management

It provides companies with a central repository for all project related documents. Information can be sorted using various different criteria and simplify access to project information for different users with different needs.

Team Collaboration

Teams can easily collaborate on projects without the need for external third party tools. Automatic e-mail notifications of project scheduling, meeting invitations and the creation and modification of new or existing documents.

Risk and Change Management

Using Genius Project's risk and change management modules companies can automate their internal methodologies, build mitigation plans into their project plans and track all problems and changes for future reference.

Dashboards and Reporting

Design sleek dashboards including views and charts for each of the different application modules in addition to the vast list of canned dashboards, charts and views already pre-loaded with the software.
