PPM SOLUTIONS FOR IT DEPARTMENTS

IS YOUR IT DEPARTMENT DEMONSTRATING BUSINESS VALUE?

As businesses evolve, more and more, Information Technology is moving from a supporting function to a strategic player driving an organization's success. Today's CIOs and IT departments understand that without the strategic alignment of IT and the corporate objectives set forth by their business leaders, their organizations can quickly lose momentum, customer confidence, and their competitive edge. In light of this reality, CIOs and IT departments demand better tools to better support their organizations in delivering higher quality service to their stakeholders.

With today's budget and resource constraints, Genius Project empowers IT PMOs, executives and team members by equipping all stakeholders with real-time project information to closely monitor any project bottlenecks impacting the bottom line.

Genius Project delivers CIOs, IT departments, and PMOs the latest in IT project and portfolio reporting, tracking and execution tools supporting IT Governance, demand management, and service delivery.

Tailored to your organization's business processes, Genius Project provides complete visibility into your project and portfolio lifecycles from demand to successful delivery.

When your company chooses Genius Inside, you are not simply choosing our experience and expertise, you are choosing a solution that conforms to and supports your processes and that will support you throughout your growth and development.

GENIUS PROJECT FOR IT DEPARTMENTS

- + Improve portfolio, project and resource visibility
- + Streamline project demand

IT Governance Framework

IT Success Can Be Planned

YOUR IT WORKING FOR YOU?

Genius Project provides a holistic view of the IT portfolio, which enables prioritizing projects and optimizing the portfolio, including KPIs, that let managers assess projects according to strategic objectives.

Genius Project supports IT Governance through:

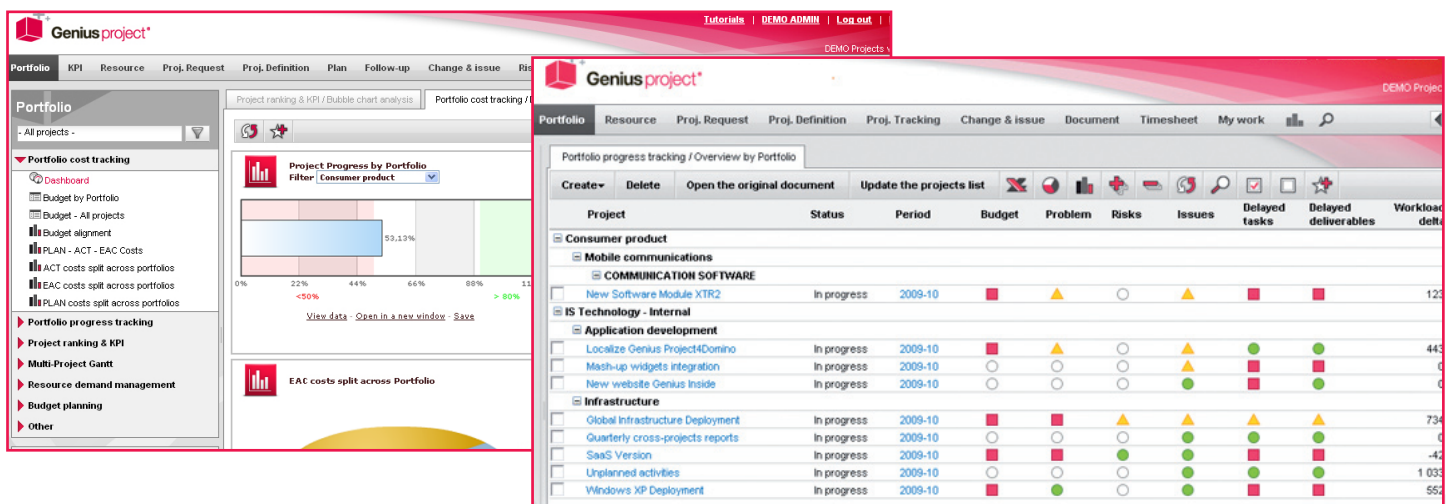

- **Project portfolio (strategic alignment)**
- **Cost and budget tracking (value delivery)**
- **Resource management**
- **Risk management**
- **Performance measurement**

HOW DO YOU MANAGE BEING IN DEMAND?

Genius Project has IT demand management capabilities that lets you collect and organize these requests and even offers you tools to better define priorities.

Genius Project allows for demand management through:

- **Project requests and workflows**
- **Request tracking and reports**
- **Change requests**
- **Issue reports**
- **Configurable workflow and email notifications**
- **Help Desk. IT tickets management**

SUCCESS CAN BE PLANNED

With Genius Project, IT departments will be better equipped to face the budget and resource constraints of today by being able to closely monitor forecasted and actual labour and costs.

Genius Project is a project and project portfolio management software that allows for complete project execution through:

- **Project planning and scheduling (Gantt chart)**
- **Resource management**
- **Project control and tracking**
- **Time and expense tracking**
- **Document management and collaboration**
- **Comprehensive budget and forecasting**

DELIVER PROJECTS ON-TIME AND WITHIN BUDGET

Genius Project can automate core processes, help control costs and manage risks, all while improving customer satisfaction and IT alignment with the business.

Genius Project helps you deliver IT services more effectively by:

- **Project cost and budget management**
- **Split budget over several years**
- **Facilitating the tracking of SLAs**
- **Reduce costs and increase satisfaction with IT Services**
- **Align its services with business-critical objectives**
- **Record all requests for IT services and tracking**
